

Springfield

Convertible Bodies

One Minute—An Open Car

The Next—A Limousine

We are pleased to announce that the
OVERLAND **STUDEBAKER**
MAXWELL **PAIGE-DETROIT**
 and **CHANDLER**

have adopted the **SPRINGFIELD** Convertible Bodies as standard equipment for their 1916 and 1917 models.

This is another significant indication of how the automobile manufacturers regard the importance, service and absolute need of a practical all-year-round car.

The **SPRINGFIELD** is the original and only practical convertible body made.

A child can change it from an open car to a limousine in a few minutes.

The Overland is another addition to a long list of manufacturers who are using or will use the **SPRINGFIELD** Convertible Bodies for their coming models.
